

EPPLE HIGH GLOSS VARNISH 1110

Product description:

The main advantage of this varnish consists in a special binding agent, combining a larger number of technical advantages in one product.

Product characteristics:

- Excellent gloss
- Low yellowing
- Excellent rub resistance
- Unproblematic handling with or without water

Pile height and possible powder quantity depend on the amount of the coating as well as on the quality of the printing substrate.

Very good piling properties (no blocking with normal coating) do not discharge the printer from his controlling obligation.

A slight drying assistance by IR drying enables faster processing.

Suitable for almost all paper grades.

This varnish can be printed wet on wet as well as wet or dry.

This technical instruction sheet is designed for your information and reference. It is based on and conforms to our current knowledge. However as actual application is affected by many factors over which we have no control, we are not liable for printing failures.
